

DOSVC Weblist 6: RCA Box 21 of 96 [there are 4 boxes of RCA records]

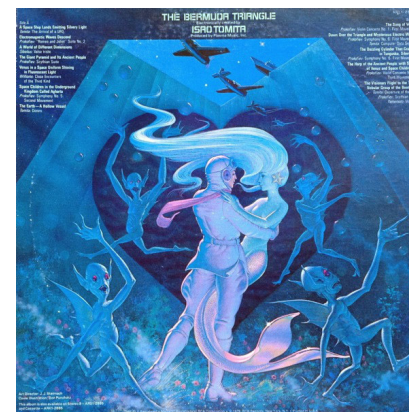

**Special information for list 6:** All these records are in superb condition—many are factory sealed. Released in the 1970s at the beginning of the digital era, CD's were gaining market share, reducing demand for the LP format. The recordings and vinyl are first class. Many are unused demonstration copies, and several are cut-outs [overstock inventory are sold at reduced price]. The inner sleeves are first rate, most are vinyl lined. Several meet audiophile standards. The market demand for these, however, is currently very low, making them a genuine bargain. **Near Mint** means not factory sealed, but appear to never have been played. A few have water damaged jackets; one of David's storage Lockers experienced a minor flood. Many he purchased at wholesale from record dealers.
